Home care for people with suspected or confirmed COVID-19
Take care of yourself and your family

For ill people

If you are ill with fever and cough

- Clean hands frequently with soap and water or with alcohol-based hand rub.
- Stay at home; do not attend work, school or public places. Rest, drink plenty of fluids and eat nutritious food.

Stay in a separate room from other family members, but if not possible wear a medical mask and keep a distance of at least 1 meter (3 feet) from other people. Keep the room well-ventilated and if possible use a dedicated bathroom.

When coughing or sneezing, cover mouth and nose with flexed elbow or use disposable tissue and discard after use. If you experience difficulty breathing, call your health care facility immediately.
